

## Professor Dr Theodoros Kyriakides

Dr Theodoros Kyriakides is a Professor at the Cyprus School of Molecular Medicine and Senior Consultant at the Cyprus Institute of Neurology and Genetics. He graduated Physiology (BSc Hons) and Medicine (MB ChB) from Bristol University in 1983.

He trained in General Medicine and Neurology in the UK and in Neuropathology in Perth Australia. Since 1992 he works as a Senior Consultant in the Cyprus Institute of Neurology and Genetics where he is also in charge of the Neuropathology Lab. His clinical interests are neuromuscular disorders and Multiple Sclerosis. He sees a variety of myopathies and neuropathies and he is particularly interested in TTRMet30 amyloidotic

neuropathy.

He joined the University of Nicosia Medical School in 2011 and he is currently the Module Convenor for Life Control for CS and T Year as well as Lead for NeuroPlus in P Year for the St. George's University of London Medical Programme delivered in Cyprus at the University of Nicosia. In 2013 he was appointed Professor at the University of Nicosia.

His main research interests include the study of Complement C1Q and C5aR inhibition in a mouse model of TTRMet30 amyloidotic neuropathy, the study of modifier genes and epigenetics in disease severity in Multiple Sclerosis.
