

Professor Dr Alberto Mantovani

Senior toxicologist of the Italian National Health Institute (Istituto Superiore di Sanità –ISS) and also an expert of the European Food Safety Authority

Alberto Mantovani (DVM, MSc, 1956) is a senior toxicologist of the Italian National Health Institute (Istituto Superiore di Sanità –ISS). He is also an expert of the European Food Safety Authority (FEEDAP Panel on animal feeds -2003-12 and 2015-18-, PPR Panel on pesticides -2012-15-, Working Group on Emerging Risks, 2010-15).

The main topic for his scientific and risk assessment activities are endocrine disrupting chemicals: besides collaborating to OECD and EU activities, he has coordinated the pilot national project on EDC (see the EDC-dedicated ISS website: <http://www.iss.it/inte>), the project PREVIENI, the first initiative on EDC biomonitoring in Italy (<http://www.iss.it/prvn>) and the project EDESIA under the EU programme LIFE, to implement a science-based substitution of EDC with safer substances (<http://www.iss.it/life>). He is currently responsible of the ISS partnership into the Horizon 2020 project Eu-ToxRisk (<http://www.eu-toxrisk.eu/>) a EU-wide programme driving mechanism-based toxicity testing and risk assessment.
